CARING FOR YOUR MAXIMUM WEATHER INSTRUMENT

Getting years, if not decades, of reliable trouble-free use from your instrument is easy if you perform regular maintenance.

NEED PARTS?

We can source many replacement parts for you. Reach out to us today.

REGULAR MAINTENANCE

Treat your Maximum instrument as you would fine jewelry, using the same care methods. Maximum also recommends regular cleaning. Do not let airborne pollutants collect on the gauge.

- Use mild glass cleaner
- Use a soft, lint-free towel (microfiber, etc.)
- Summer home? Lay a cloth across the top two-thirds to keep dust from settling while you are away.

INDIVIDUAL INSTRUMENTS

Every instrument will have its own **specific** care instructions. Don't forget these steps!

SENSORS

Sensors are obviously more durable. However, these should be cleaned of debris and dirt at least twice a year.

DIY REPAIRS

Some Maximum instruments are DIY repair friendly, but Maximum recommends professional repair.
